SPECIAL MENTION

Anthony Franze **Autonomi: A Multi-Function Vehicle for China 2020**

Photography: Anthony Franze

Autonomi - an inner city vehicle for Shanghai or Beijing. The judges were impressed with the extremely high level of professional illustration. The interior and exterior styling reflected the Chinese culture extremely well and the technological concepts certainly showed a path to the future. The modular nature of converting from a domestic to a business vehicle or a pre-programmed courier vehicle was appropriate to the busy, business related lifestyles of these large Chinese cities. A very commendable piece of work, certainly worthy of a commendation.

COMMENDATION

Memake **Porcini Stem/Canopy**

Photography: Joel Johnston

The judging panel were endeared to this lighting product range by the ability of the designers to combine the qualities of craftsmanship, bespoke finishes and aesthetic beauty, with the sometimes conflicting needs of industrial production, efficient packaging/transportation and easy consumer self assembly. The detailing of the product range has been highly resolved incorporating elegant material interfaces resulting in a design style that can be translated into future products.
